THE APPLICANT MUST PROVIDE THE FOLLOWING INFORMATION FOR PERMIT PROCESSING *(Attach additional sheets if necessary)*

A. A site-plan that must be accurate, legible and drawn to scale (**a recent survey will often be required**) that provides the following:

1. The existing dimensions and lot size, proposed dimensions and lot size.
2. Identify adjacent streets, existing and proposed access.
3. Identify existing and proposed structures and distances to property lines.
4. Location of proposed alterations or improvements.
5. Location of sensitive areas on or near the site.
6. If possible, locate drainage channels, sewer and water lines.
7. Identify existing and proposed easements.

B. Clearing, grading, filling, excavating plan. In addition to the above, you must provide the following information (some plans may be required to be prepared by professional engineer licensed in the State of Washington):

1. Topographical map with contour lines at five (5) foot intervals.
2. Designate areas involving land clearing, filling, land cuts or excavation.
3. Identify the amount of excavation, fill, and removal of material in cubic yards.
4. Locate all significant trees (6" diameter or greater) and identify type and size. Designate those trees to be removed and those to be protected.
5. Identify areas to be revegetated and/or restored. Provide plant types and methods.

C. Erosion control plan. This may include erosion and sedimentation control, vegetation management plan, landscape plan, restoration plan, etc. (some plans may be required to be prepared by a licensed professional engineer in the State of Washington):

1. Locate areas that erosion and sedimentation control devices are to be installed. Include details for silt fence or any other mechanisms.
2. Identify areas to be revegetated or restored, types of vegetation and timing for implementation.

D. Drainage Plan. This should be prepared by professional engineer licensed in the State of Washington. Drainage requirements, systems and techniques must comply with the King County Surface Water Design Manual, as adopted by the City of Lake Forest Park.

E. Mitigation Plan (May include elements of other required plans, such as erosion control and drainage plans). Some plans may be required to be prepared by a licensed, professional engineer in the State of Washington or a qualified ecologist/biologist.
