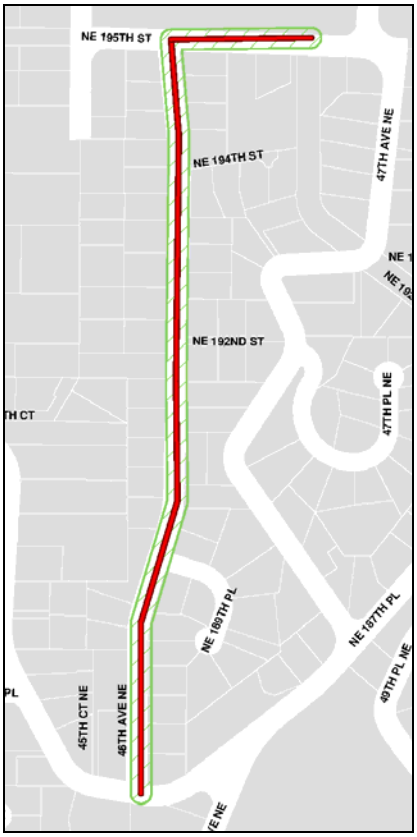
King County Wastewater Treatment Division

Street overlay / paving later this week

Beginning on Thursday, April 16, a contractor working for King County will begin repaving along NE 195th Street and 46th Ave. NE in the area previously disturbed by waterline installation.

Work will include:

- Thursday, April 16 – workers will grind down street pavement. This will be linear work, so any street or driveway closures will be of short duration
- Friday, April 17 – re-paving of street. Work is anticipated to start on 195th and then down 46th Ave. Partial lane and driveway closures will happen but only for the time it takes for paving and cooling of the pavement
- Work is expected to be completed by Friday evening.



Approximate area of work

Approved hours of work are 7:00 a.m. to 9:00 p.m. Monday through Friday and 8:00 a.m. to 9:00 p.m. on weekends and holidays. However, the contractor has indicated that they will be working mainly during daylight hours.

Traffic control: We will be working in the street and traffic controls will be in place. It is expected the contractor will provide one way access with flaggers along the route, with only short delays. During paving there may be short-term closures to individual driveways. The contractor will try to communicate and work with individual homeowners regarding their driveway access during construction.

Work approved under City of Lake Forest Park Right of Way Permit #ROW08-08-3077
