PROJECT NAME: LIMANTZAKIS

To whom it may concern,

This letter is to give a general description of the work we are doing at 15514 Beach Dr. NE. For this project we propose demo the existing dock & all piles; We propose to construct a 30' x 3'-10" wide entry continuing on to a 50' long and 5'-10" wide walkway with a 32' x 7'-10" ELL at the end. We will also construct a finger 32' x 3'-10" & 12' x 1'-10". We will also drive (26) new 8" steel piles & (3) new 8" steel support piles.

The existing property and surround areas are currently a single family residences with an existing docks. We are improving the structure of the dock by updating to steel piles and installing a light permeable surface.

Please let me know if there is anything else you need from me on this project.
